

16. The method of claim 12 further comprising allowing the colored coating to dry before placing the lens under the heat source.

Below is a redlined version of the amended claims showing the changes made by this amendment. Text which was deleted is enclosed between brackets, and inserted text is underlined:

1. An apparatus, comprising:
A lens having an edge; and,
a colored coating affixed to at least a portion of only the edge of the lens.
2. The apparatus of claim 1 further comprising[:]
a scratch-guard coating.
9. A method of applying a colored coating to a lens having an edge, comprising[:]
applying the colored coating to at least a portion of the edge of the lens such that the colored coating is affixed only to the edge of the lens.
13. The method of claim [9]12 further comprising[:]
removing any excess colored coating from the face of the lens.
16. The method of claim [9]12 further comprising[:]
allowing the colored coating to dry before placing the lens under the heat source.

In addition, please amend the specification by adding the following after the end of the second full paragraph on page 2:

Brief Description of the Drawings

Figure 1 is a three-dimensional drawing of an eyeglass lens.

Figure 2a is a side view of eyeglasses having a lens in a frame.
